

APPENDICES

The appendices of this COM Plan address the projects identified as the SWIP – Southern Portion and the SWIP – Central Portion. Collectively the SWIP – Southern Portion and the SWIP – Central Portion shall be referred to herein as the “projects” or each individually as a “project.” Except where specified otherwise, each appendix is applicable to both of the projects.

These appendices are organized into six sections (Appendices A – F) as outlined below. They are derived from the SWIP Draft and Final Environmental Impact Statements (EISs) (1992-1993), the ROD and right-of-way grants (1994, and subsequent extensions and amendments), discussions with relevant federal and state agencies, from information provided in relevant previous COM Plans (e.g., *Final Falcon-to-Gonder 345kV Transmission Project COM Plan, May 2002*, and the *Harry Allen-to-Mead 500kV Transmission Line Project, Plan of Development, June 2005*), and in accordance with the Biological Opinion (December 2007), and the 2008 EA, Finding of No Significant Impact and Decision Record prepared for the SWIP – Southern Portion.

Appendix A: Construction Considerations – This appendix offers detailed information about the specifics of construction including:

- A1 – Construction Plan and Program
- A2 – Transportation Management Plan
- A3 – Blasting Plan Methodology
- A4 – Flagging, Fencing, and Signage Plan
- A5 – Erosion, Dust Control and Air Quality Plan
- A6 – Fire Protection Plan
- A7 – Hazardous Materials Management Plan
- A8 – Emergency Preparedness and Response Plan Guidelines

Appendix B: Biological Considerations – This appendix includes:

- B1 – Biological Opinion (BO)
- B2 – Biological Protection Plan
- B3 – Noxious Weed Management Plan

Appendix C: Cultural and Paleontological Considerations – This appendix includes:

- C1 – Historic Properties Treatment Plan
- C2 – Paleontological Literature Review and Treatment Plan

Appendix D: Other Special Resource Considerations – This appendix includes information and mitigation measures specific to other environmental resource considerations (e.g., recreation, visual resources, etc.).

Appendix E: Storm Water Pollution and Prevention Plan Methodology – This appendix outlines the requirements and methodology for the preparation and submittal of a Storm Water Pollution and Prevention Plan that will be completed by the construction contractor in order to meet the National Pollutant Discharge Elimination System general permit.

Appendix F: Right-of-Way Preparation, Rehabilitation, and Restoration Plan – Outlines a plan to be applied during the preparation of the right-of-way and during the construction and reclamation phases of the projects. This plan also provides guidance for monitoring the success of the reclamation process as appropriate.
