Subject: City of Rancho Cucamonga comments on the proposed Boulder Canyon Project Resource Allocation

Dear Mr. Moulton:

The City of Rancho Cucamonga appreciates the opportunity to comment on the proposed Post 2017 Boulder Canyon Project (BCP) resource allocation.

The City-owned Rancho Cucamonga Municipal Utility (RCMU) would like to acknowledge the Western Area Power Administration's (Western's) fair and consistent process in developing the proposed allocations and believes the proposed allocations provide a widespread benefit of the BCP resource to new entities. The proposed allocation for RCMU would ensure that the utility will have a stable, renewable and GHG free resource such as Hoover for the next 50 years.

As a small electric utility entering its 10th year in operation, being provided this long term cost effective federal resource allocation from Western is a once in a lifetime opportunity. RCMU is excited in moving forward in this process and looks forward to the proposed allocations being finalized.

Sincerely,

Fred Lyn
Utilities Division Manager
