Subject: Fort Carson Letter of Interest for Proposed P-SMBP-ED Resource Pool
(UNCLASSIFIED)

Classification: UNCLASSIFIED
Caveats: NONE

Dear Mr. James Keselburg,

Fort Carson is interested in obtaining an allocation from the proposed P-SMBP-ED resource pool. Fort Carson is a U.S. Army Installation located at Fort Carson, Colorado. An allocation from this resource pool would help Fort Carson meet its increasing energy demands. It would also help us further diversify our energy portfolio and stabilize our energy costs. Fort Carson is growing from about 15,000 soldiers to 25,000 soldiers. Our energy demand and consumption will be increasing over 50% within the next 3 years due to Fort Carson's growth.

Since 10 CFR Part 905 allows allocations of power from these project-specific pools "for other appropriate purposes as determined by Western", please consider bundling this entire allocation with qualifying renewable energy resources. This would help eligible customers leverage the savings from P-SMBP-ED's lower cost power to purchase renewable energy and meet EPACT 2005 renewable energy requirements.

Thanks for your consideration,
Vince Guthrie
