Mr. Faust -

The City of Shasta Lake is aware from meeting notes and shared emails between the various IOA's customers, that WAPA is considering the implementation of a new rate addressing Order 890. I'll cut right to the chase, the City of Shasta Lake respectfully requests that WAPA leave the current rate and methodology for regulation and frequency service as is. If WAPA feels compelled to move forward with a new rate, we would support having two different rates: (1) keeping the existing customers under the existing rates and, (2) implementing a new Order 890 rate for any new customer wanting regulation and frequency service.

We value the opportunity to comment and appreciate your time and consideration with this matter.

Thank you,

Tom Miller

Electric Utility Director

City of Shasta Lake
