- (1) The Rate Type abbreviations are as follows:
D: The transmission charge is based on demand units.
E: The transmission charge is based on energy units.
F: A flat annual fee is paid for transmission.
N: The transmission charge is part of a network integrated transmission service charge.
- (2) This is a direct delivery from Western's system, therefore there are no transmission charges.
- (3) This customer did not take service in FY 2002.
- (4) This customer had more than one transmission provider. Their transmission providers charged based on different rate types.
