

Questions from June 30 SPP meeting

1. **Is Chris going to talk about the PRM study that SPP will do for SPP West?** YouTube time code: 00:36:50

Paraphrased answer from SPP: SPP plans to do a study, but there is discussion that would need to take place before we could get into the study process. We could use how we perform the study in the East as a foundation and then identify where the differences are in the West. If this initiative continues to move forward, we will begin scoping the study next year to determine an appropriate PRM for the West.

2. **Any chance there is a glossary of sorts for SPP acronyms?** YouTube time code: 01:23:20

Paraphrased answer from SPP: There is no glossary, but in the slides, we use the full term in first reference followed by the acronym in parentheses. Our tariff and market protocols also have many of the terms that we are describing today.

3. **Is this the second meeting? Where is the recording of the first presentation posted?** YouTube time code: 01:25:10

Paraphrased answer from WAPA: Yes, this is our second informational webinar with SPP. The first presentation and recording, as well as this webinar's materials, will be posted on the [SPP RTO membership initiative webpage](#) on The Source.
