Good afternoon,

This week, Congress is addressing another continuing resolution, or CR, that will serve as a short-term spending bill for government agencies past Jan. 19. If there is a federal government shutdown or a lapse in appropriations, be assured that we are committed to our mission, our financial stewardship and our operational responsibilities.

Thanks to sound past financial management and the varied funding sources, including customer receipts, advanced funds and unobligated balances consistent with our reserve strategy, WAPA will be able to continue normal operations in the near future. We will meet our contractual commitments and ensure the reliability of the power system.

Both extended CRs and a lapse in appropriations may delay or increase risks to some construction and rehabilitation projects funded fully or in part by appropriations. Regional managers and customer service representatives will be in touch with you about any affected projects.

As always, we will continue to monitor the events and communicate any changes as events unfold.

Thank you for your continued support cooperation and partnership.

Dennis R. Sullivan | Chief Financial Officer
