## Western Area Power Administration

*Powering the energy frontier*

Good day,

Today, WAPA published a notice of intent for [Open Access Transmission Tariff Revision 22-02](#) on the [Open Access Same-Time Information System](#). This revision addresses Federal Energy Regulatory Commission Orders 676-I/J Standards for Business Practices and Communication Protocols for Public Utilities and FERC Order 881 Managing Transmission Line Ratings.

The OATT revisions will primarily apply to existing Attachment N for FERC Orders 676-I/J and a new Attachment U for FERC Order 881. All information related to this OATT revision will be posted on the OASIS webpage.

Customers and other stakeholders will be able to review and provide input on the proposed changes during a 30-day informal comment period, which will include a webinar. The informal comment period will begin around Nov. 15 when WAPA posts a complete draft of the proposed revisions on OASIS.

The OATT Revision 22-02 [webinar](#) is scheduled for Dec. 7 at 10 a.m. MST. At this webinar, WAPA will present the proposed changes and outline the expected timeline to respond to stakeholder comments, complete the OATT revision and file the updated OATT revision with FERC.

We look forward to working with our customers and stakeholders on these proposed OATT revisions. If you have any questions or comments, contact your WAPA OATT regional contact:
