Good afternoon,

As shared in earlier emails, we are revising our Open Access Transmission Service Tariff to increase benefits to our customers as well as bring our OATT more in line with Federal Energy Regulatory Commission orders and regulations.

We greatly appreciate the continued input and engagement from our customers on this effort. Today, [we posted the comments](#) we received as well as our responses to the [Open Access Same-Time Information System](#).

The comments have been grouped by topic and summarized where appropriate.

Our goal is to finalize the OATT revision package in the first half of March and file with FERC in early April.

We initially announced our intent to revise the transmission tariff Oct. 4. To share the proposed changes with customers and gather feedback, we held an informal comment period on the tariff revisions from Dec. 28 through Feb. 1 and hosted a webinar Jan. 11. You can [see the webinar materials](#) on OASIS.

Thank you again for your feedback and collaboration. We will continue to communicate our progress as we move toward filing with FERC.

If you have any questions or comments, contact your WAPA OATT regional contact:
