On Jan. 30, WAPA added [financial and operational information](#) for fiscal year 2019 to The Source, meeting our commitment to update the site within 120 days of FY end.

In addition to the data, we added a [narrative](#) that provides context for the new data and describes the primary drivers and variances behind costs compared with the prior year.

The Source now contains 12 years of information, including:

- [Rates and sales data by power system](#)
- [Federal full-time equivalents](#)
- [Regional and Headquarters expenditures](#)
- [Capital investments by project](#)
- [Returns to Treasury](#)

Also included on the site is the [reserve balance strategy](#) for Fiscal Years 2016 through 2019 and the most recent year-end balances.

We remain committed to improving transparency, both with customers and other branches of government. As we continue to develop this site based on feedback from you, we will provide detailed cost information and narrative summaries annually. If you have questions or comments about this site, email publicaffairs@wapa.gov.
