## Western Area Power Administration

*Powering the energy frontier*

Good day,

We wanted to give a brief update on [Open Access Transmission Tariff Revision 22-01](#) for Desert Southwest's participation in the California Independent System Operator Western Energy Imbalance Market starting on or about April 5, 2023.

Today, we posted the stakeholder comments and our responses to WAPA's [Open Access Same-Time Information System](#) as well as the final OATT revision redline documents. We made only nonmaterial clean-up and formatting edits to the Attachment T from July 1.

The next steps for OATT Revision 22-01 are:

- Federal Energy Regulatory Commission filing around Nov. 3.
- Effective date of OATT Revision 22-01 is 90 days after FERC filing.
- Finalize associated Business Practices on [DSW's OASIS page](#).

We greatly appreciate your participation and comments on the proposed revisions. Additional information and updates will be posted on WAPA's OASIS.

If you have any questions or comments, contact your WAPA OATT regional contact:
