Good afternoon,

Materials for the June 22 webinar on WAPA's proposed Open Access Transmission Tariff revision 20-02 are now available on WAPA's [Open Access Same-Time Information System](#).

As stated in the June 1 [notice of intent](#), OATT revision 20-02 will address the Colorado River Storage Project's and Rocky Mountain's participation in the Southwest Power Pool Western Energy Imbalance Service market starting Feb. 1, 2021 and make other clean up and maintenance updates.

The materials include the webinar presentation and redlines for WAPA's OATT including a proposed new OATT Attachment R. The availability of this material starts a 30-day informal comment period for customers and other stakeholders that will end July 16.

We want to hear from you as we evaluate these changes. [Join us for the webinar](#) June 22 at 10 a.m. MT to review the proposed revisions and the expected filing schedule.

If you have any questions or comments, contact your WAPA OATT regional contact:
