WAPA has started two concurrent processes to revise its Open Access Transmission Tariff to address upcoming moves into energy imbalance markets as well as other clean up and maintenance items.

Today, WAPA published notices of intent for OATT revisions 20-01 and 20-02 on the [Open Access Same-Time Information System](#). All information related to these OATT revisions will be posted on the OASIS webpage.

Both processes will include informal comment periods and webinars to allow customers and other stakeholders an opportunity to review and provide input on the proposed changes. During the webinars, WAPA will also outline the expected timeline to respond to stakeholder comments, complete the OATT revisions and file the updated OATT revisions with the Federal Energy Regulatory Commission.

SN EIM participation

[OATT Revision 20-01](#) will address Sierra Nevada's participation in the California Independent System Operator Western Energy Imbalance Market starting April 1, 2021. Provisions for this participation will be proposed mainly under a new Attachment S to WAPA's OATT. An [advance draft](#) of the new attachment and [frequently asked questions](#) are now available on OASIS.

WAPA will host a [webinar](#) on OATT Revision 20-01 July 8 at 10 a.m. MDT to present the proposed changes. Around June 29, WAPA will post a completed draft of its proposed revisions on OASIS, which will initiate a 30-day comment period.

CRSP and RM WEIS participation

[OATT Revision 20-02](#) will address the Colorado River Storage Project's and Rocky Mountain's participation in the Southwest Power Pool Western Energy Imbalance Service market starting Feb. 1, 2021. [FAQs on this revision](#) are currently available on OASIS.

The proposed changes will be presented during a June 22 [webinar](#) at 10 a.m. MDT. Before the June 22 webinar, WAPA will post the draft of its proposed revisions, which will also initiate a 30-day informal comment period.

We look forward to working with our customers and stakeholders on these proposed OATT revisions. If you have any questions or comments, contact your regional OATT contact:
