Proposed Action Title: Mead Service Building Repairs

Program or Field Office: Western Area Power Administration/ Desert Southwest Region
Location(s) (City/County/State): Boulder City, Clark County, Nevada

Proposed Action Description:
Western plans to prevent further rain water damage and repair recent damage to the Service/Maintenance Building located at Mead Substation. The substation is located at 2051 Buchanan Boulevard, Boulder City, Nevada. Western owns the land.

The work entails painting and caulking to seal the exterior block walls on the east, south, and west sides of the building. The north side was similarly treated last year and is not leaking. Damage to interior drywall will be repaired and repainted. The contractor may use a man-lift or ladders to reach the upper portions of the exterior walls. Existing access roads will be used in their current condition.

Western plans to conduct this work between 9/8/14 and 10/31/14. Fieldwork is expected to take 1 to 3 days to complete.

The purpose of the work is to ensure the safety and reliability of the bulk electric system by providing a safe environment for workers and office equipment. The work is urgently needed because rainwater currently enters the building through the unsealed block walls.

SEE CONTINUATION SHEET

Categorical Exclusion(s) Applied:
B1.3 - Routine maintenance

For the complete DOE National Environmental Policy Act regulations regarding categorical exclusions, including the full text of each categorical exclusion, see Subpart D of 10 CFR Part 1021.

Regulatory Requirements in 10 CFR 1021.410(b): (See full text in regulation)

☑️ The proposal fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D.

To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

☑️ There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.

☑️ The proposal has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

Based on my review of the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1B), I have determined that the proposed action fits within the specified class(es) of action, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.

Date Determined: 8·28·14
Categorical Exclusion Determination Form – Continuation Sheet
Mead Service Building Repairs

Special Conditions:

1) Any contractors working on-site shall attend a Desert Tortoise Awareness Training (Western personnel receive such training every year).
2) All project workers shall be responsible for checking in, under, and around equipment prior to moving it. If a tortoise is discovered in any work areas, operations will immediately cease in the vicinity of the tortoise until the tortoise has left on its own so as to prevent harm or harassment to the tortoise.
3) No tortoises shall be handled or moved by project personnel.
4) No liquids or other potentially harmful substances shall be left stored or otherwise exposed at ground-level. Any spills, pools, or puddles shall be cleaned up immediately. (e.g., no liquid thinners, water, etc. should be left within about 12” of ground level.)
Service/ Maintenance Building, Mead Substation

property determined to be eligible for listing on the National Register of Historic Places;

(ii) Federally-listed threatened or endangered species or their habitat (including critical habitat) or Federally-proposed or candidate species or their habitat (Endangered Species Act); state-listed or state-proposed endangered or threatened species or their habitat; Federally-protected marine mammals and Essential Fish Habitat (Marine Mammal Protection Act; Magnuson-Stevens Fishery Conservation and Management Act); and otherwise Federally-protected species (such as under the Bald and Golden Eagle Protection Act or the Migratory Bird Treaty Act);

(iii) Floodplains and wetlands (as defined in 10 CFR 1022.4, —Compliance with Floodplain and Wetland Environmental Review Requirements: “Definitions,” or its successor);

(iv) Areas having a special designation such as Federally- and state-designated wilderness areas, national parks, national monuments, national natural landmarks, wild and scenic rivers, state and Federal wildlife refuges, scenic areas (such as National Scenic and Historic Trails or National Scenic Areas), and marine sanctuaries;

(v) Prime or unique farmland, or other farmland of statewide or local importance, as defined at 7 CFR 658.2(a), —Farmland Protection Policy Act: Definitions[,] or its successor;

(vi) Special sources of water (such as sole-source aquifers, wellhead protection areas, and other water sources that are vital in a region); and

(vii) Tundra, coral reefs, or rain forests; or

(5) Involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those of the Department of Agriculture, the Environmental Protection Agency, and the National Institutes of Health.
