

Environmental Policy

Western Area Power Administration

Western will conduct its mission of marketing and delivering reliable, cost-based hydroelectric power and related services in compliance with environmental laws and regulations. Business will be conducted in an efficient, environmentally sustainable, and economically sound manner. Western will use its environmental management system to implement this policy and continually improve environmental performance. Western will use effective environmental planning to avoid, minimize, or mitigate environmental impacts of its actions. Protecting the environment is a sound business practice and is every employee's responsibility.
