not consider applications submitted before publication of this notice or after the deadline specified in the DATES section. Application forms are available upon request or may be accessed and/or submitted online at http://www.wapa.gov/dsw/pwrmkt/BCP.Remarketing/BCP.Remarketing.htm.

Applicant Profile Data Application

The content and format of the APD are outlined below. Applicants must provide all requested information, or the most reasonable available estimate, or should indicate “not applicable” if they have no information to be considered for a requested item. Western is not responsible for errors in data or missing pages. All items of information in the APD should be answered as if prepared by the entity seeking the allocation. The APD includes the following:

1. Applicant:
   a. Applicant’s (entity requesting a new allocation) name and address.
   d. Parent organization of applicant, if any.
   e. Name of members or suballottees, if any.
   f. Applicable law under which the organization was established.
   g. Applicant’s geographic service area: If available, submit a map of the service area, and indicate the date prepared.
   h. Describe the entity/organization that will interact with Western on contract and billing matters.
   i. The amount of power the applicant is requesting to be provided by Western.

2. Loads:
   a. All Applicants:
      i. If applicable, number and type of customers served in one of the last three calendar years including calendar years 2011, 2012, or 2013; e.g., residential, commercial, industrial, military base, agricultural.
      ii. The actual monthly maximum demand (in kilowatts) and energy use (in kilowatt hours) experienced in one of the last three calendar years including calendar years 2011, 2012, or 2013.
      iii. For Native American tribe applicants, if actual demand and energy data is not available, provide estimated monthly demand (in kilowatts) with a description of the method and basis for this estimated demand.

3. Resources:
   a. A list of current power supplies, including the applicant’s own generation and purchases from others. For each supply, provide the amount of capacity received from that power supply and its location.
   b. Status of power supply contract(s), including a contract termination date. Indicate whether power supply is on a firm basis or some other type of arrangement.
   c. Provide a brief explanation of the applicant’s ability to receive and use, or receive and distribute Federal power as of October 1, 2017.
   d. Provide a single-line drawing of applicant’s system, if available.
   e. A list of current power supplies, including the applicant’s own generation and purchases from others.
   f. Applicable law under which the organization was established.
   g. Applicant’s geographic service area: If available, submit a map of the service area, and indicate the date prepared.
   h. Describe the entity/organization that will interact with Western on contract and billing matters.
   i. The amount of power the applicant is requesting to be provided by Western.

4. Transmission:
   a. Point(s) of delivery: BCP will be delivered at Mead Substation.
   b. Transmission arrangement:
      i. Provide a single-line drawing of applicant’s system, if available.
      ii. Provide a brief explanation of the applicant’s ability to receive and use, or receive and distribute Federal power as of October 1, 2017.

5. Other Information:
   a. Western may request, in writing, additional information from any applicant whose APD is determined to be deficient. The applicant will have 15 calendar days from the date on Western’s letter of request to provide the information.
   b. If Western determines the applicant does not meet the eligibility criteria, Western will send a letter explaining why the applicant did not qualify.
   c. If the applicant has met the eligibility criteria, Western, through the public process, will determine the amount of power, if any, to allocate in accordance with the marketing criteria. Western will send a draft contract to the applicant that identifies the terms and conditions of the offer and the amount of power allocated to the applicant.

Regulatory Procedure Requirements

Determination Under Executive Order 12866

Western has an exemption from centralized regulatory review under Executive Order 12866; accordingly, no clearance of this notice by the Office of Management and Budget is required.

Environmental Compliance

In accordance with the DOE National Environmental Policy Act Implementing Procedures (10 CFR 1021), Western has determined that these actions fit within a class of action B4.1 Contracts, policies, and marketing and allocation plans for electric power, in Appendix B to Subpart D to Part 1021—Categorical Exclusions Applicable to Specific Agency Actions.

Dated: December 17, 2013

Mark A. Gabriel,
Administrator.

DEPARTMENT OF ENERGY

Western Area Power Administration

Loveland Area Projects—2025 Power Marketing Initiative

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of Final 2025 Power Marketing Initiative.

SUMMARY: Western Area Power Administration (Western), Rocky Mountain Region, a Federal power marketing agency of the Department of Energy (DOE), announces the 2025 Power Marketing Initiative (2025 PMI). The 2025 PMI provides the basis for marketing the long-term firm hydroelectric resources of the Loveland Area Projects (LAP) beginning with the Federal fiscal year 2025. Western’s Firm Electric Service (FES) contracts associated with the current marketing plan expire September 30, 2024. The 2025 PMI extends the current marketing plan, with amendments to key marketing plan principles.

Western’s proposed 2025 PMI was published in the Federal Register on October 17, 2011. Responses to public comments are included in this notice. This Federal Register notice is published to announce Western’s decisions for the 2025 PMI.

DATES: The 2025 PMI will become effective January 29, 2014.

ADDRESSES: Information regarding the 2025 PMI, including comments, letters, and other supporting documents made
or retained by Western for the purpose of developing this 2025 PMI, are available for public inspection and copying at Western Area Power Administration, Rocky Mountain Region, 5555 East Crossroads Boulevard, Loveland, CO 80538–8986.

FOR FURTHER INFORMATION CONTACT: Mr. John C. Gierard, Hydraulic Engineer, Western Area Power Administration, Rocky Mountain Region, 5555 East Crossroads Boulevard, Loveland, CO 80538–8986; telephone (970) 461–7445; email gierard@wapa.gov.

SUPPLEMENTARY INFORMATION:

Current Marketing Plan Background

The Post-1989 General Power Marketing and Allocation Criteria (Post-1989 Plan) for the Pick-Sloan Missouri Basin Program-Western Division and the Fryingpan-Arkansas Project (collectively known as Loveland Area Projects or LAP) was published in the Federal Register (51 FR 4012, January 31, 1986) and provided the marketing plan principles used to market LAP firm hydropower resources. The FES contracts associated with the Post-1989 Plan were initially to expire September 30, 2004. Subpart C of the Energy Planning and Management Program (EPAMP) final rule, published in the Federal Register (60 FR 54151, October 20, 1995), extended and amended the Post-1989 Plan. EPAMP authorized extending the FES contracts associated with the Post-1989 Plan through September 30, 2024, and established the Post-2004, Post-2009, and Post-2014 resource pools. The current marketing plan is inclusive of the Post-1989 Plan as extended and amended by EPAMP and the Post-2004, Post-2009, and Post-2014 power marketing initiatives.

2025 PMI

Western initiated informal 2025 PMI discussions with LAP FES customers in the summer of 2011 by holding meetings in the Rocky Mountain Region. In addition, Western held meetings with Native American tribal governments in Kansas and Wyoming to initiate government-to-government consultation with tribal FES customers. The meetings provided customers the opportunity to review current marketing plan principles and provide informal input to Western for consideration in the 2025 PMI proposal. Key marketing plan principles discussed with FES customers included: Contract Term, Resource Pools, Marketable Resource, Hydrology and River Operations Withdrawal Provision, Marketing Area, and Mt. Elbert Pumped-Storage.

Customer input for the 2025 PMI proposal supported Western extending the current marketing plan with amendments to the Contract Term and Resource Pool principles.

Western published its proposed 2025 PMI in the Federal Register (76 FR 64083, October 17, 2011) and initiated a 106-day public comment period. Public information and comment forums on the proposed 2025 PMI were held on November 29, 2011, in Loveland, Colorado, and November 30, 2011, in Topeka, Kansas. Western received no oral comments during the public comment forums and nine comment letters during the public comment period, which closed at 4 p.m. M.S.T., January 30, 2012.

Western’s responses to the comments contained in the public comment letters are included in this notice. After consideration of public comments received, Western has decided to finalize the proposed 2025 PMI as published in the Federal Register (76 FR 64083, October 17, 2011).

Response to Comments Regarding the Proposed 2025 PMI

The public comments below regarding the proposed 2025 PMI are paraphrased for brevity when not affecting the meaning of the statement(s).

2025 PMI General Comment

Comment: All comments received supported the 2025 PMI proposal. Further, the comments indicated the 2025 PMI proposal provided certainty in planning and a sense of energy security. Response: Western appreciates the comments received and the support for the 2025 PMI proposal published in the Federal Register (76 FR 64083, October 17, 2011).

Amended Marketing Plan Principles and Comments

1. Proposed Contract Term: A 30-year contract term would be used for FES contracts. The FES contract term would begin October 1, 2024, and expire September 30, 2054.

Comment: All comments Western received supported the proposed 30-year contract term, although one comment also suggested Western consider a 40-year contract term.

Commenters stated a 30-year contract term would provide assurance that the customers who have funded needed capital investments would receive the benefits of that commitment. Comments further indicated the 30-year contract term would provide certainty in customer planning; not adversely affect Western’s Federal power program responsibilities; and extend the long standing tradition of working together. Response: Western considered a 40-year contract term; however, it agrees with the comments above and believes the 30-year contract term strikes the best balance between the customers’ need for assurance and Western’s need for flexibility. Western clarifies it will execute contracts prior to October 1, 2024, committing the LAP resource for a 30-year period from October 1, 2024, and continuing through September 30, 2054.

Western also recognizes and appreciates the customers’ unique contribution in providing funding for needed capital investments in support of the Federal power program.

2. Proposed Resource Pools: The proposed 2025 PMI provides for three resource pools of up to 1 percent of the marketable resource under contract at the time of each reallocation that will ensure eligible new preference entities. Reallocations would occur at the beginning of the October 1, 2024, contract term and again every 10 years thereafter on October 1, 2034, and October 1, 2044.

Comment: Customers supported the proposed structure and timing of resource pools stating they will ensure eligible entities not currently receiving the benefits of LAP hydropower will be able to seek an allocation in the future. It also will ensure fairness among entities through an equitable process.

Response: Western appreciates the customers’ support of the proposed resource pools. The resource pools allow Western to market allocations of firm power to eligible new preference entities in such a manner as to promote the most widespread use, in accordance with Federal Reclamation law.

Extended Marketing Plan Principles and Comments

1. Proposed Marketable Resource: Extend the existing contract rates of delivery commitments, with associated energy, to existing long-term FES customers reduced by up to 1 percent for each new resource pool on October 1, 2024, October 1, 2034, and October 1, 2044.

Comment: Two commenters specifically supported continuation of the current marketable resource, noting Western worked with the United States Bureau of Reclamation in analyzing historic hydrologic data to affirm the viability of the current marketable resource.

Response: Western appreciates the customers’ support of its determination of marketable resource.

2. Proposed Hydrology and River Operations Withdrawal Provision:
Western would reserve the right to adjust, at its discretion and sole
determination, the contract rate of
delivery on 5 years advance written
notice in response to changes in
hydrology and river operations.

Comment: It was noted Western’s
proposed withdrawal provision fairly
reflects the variety of forces that could
impact Western’s administration of LAP
and would provide Western with the
tools to address any substantial changes
in hydrology and river operations.

Response: Western appreciates the
customers’ support of flexibility for
Western to adjust contract rates of
delivery in response to changes in
hydrology and river operations.

3. Proposed Marketing Area: Western
would extend the current LAP
marketing area which is the portion of
Colorado east of the Continental Divide;
Mountain Parks Electric, Inc.’s service
territory in Colorado west of the
Continental Divide; the portion of
Kansas located in the Missouri River
Basin; the portion of Kansas west of the
eastern borders of the counties
intersected by the 100th Meridian; the
portion of Nebraska west of the 101st
Meridian; and Wyoming east of the
Continental Divide.

Comment: Customers supported
continuing the current LAP marketing
area and commented that since LAP is
a finite and defined resource, expansion
of the marketing area is impracticable.

Response: Western appreciates the
customers’ support of the proposed LAP
marketing area.

4. Proposed Mt. Elbert Pumped-
Storage: Western would extend the
current Mt. Elbert Pumped-Storage
contract provisions, which provide for
pumped-storage energy.

Comment: Western received no
comments on the proposed Mt. Elbert
Pumped-Storage.

Final 2025 PMI

Western will extend the current
marketing plan with amendments to the
Contract Term and Resource Pool
principles. The marketing plan
principles that are amended as well as
the marketing plan principles that are
extended are as follows:

Amended Marketing Plan Principles

1. Contract Term: Western extends its
commitment of the LAP resource for a
30-year period beginning October 1,
2024, and continuing through
September 30, 2054.

2. Resource Pools: The 2025 PMI
provides resource pools of up to 1
percent of the marketable resource
under contract at the time for eligible
new preference entities. Reallocations
will occur beginning October 1, 2024,
and again every 10 years thereafter
(October 1, 2034, and October 1, 2044).

Extended Marketing Plan Principles

Extension of the current marketing plan includes all provisions and
principles not specifically addressed in the preceding section entitled
“Amended Marketing Plan Principles.” The following key principles of the
current LAP marketing plan were discussed with Western customers during
the proposed 2025 PMI informal
customer input phase and the formal
public information forums and are
included below for reference purposes.

1. Marketable Resource: The
contractually committed contract rate of
delivery and associated energy in effect
on September 30, 2024, will be
extended subject to up to 1 percent
reduction for each of the resource pools
taking effect on October 1, 2024,
October 1, 2034, and October 1, 2044.

2. Hydrology and River Operations
Withdrawal Provision: Western reserves
the right to adjust, at its discretion and
sole determination, the contract rate of
delivery on 5 years advance written
notice in response to changes in
hydrology and river operations.

3. Marketing Area: The LAP
marketing area will be the portion of
Colorado east of the Continental Divide;
Mountain Parks Electric, Inc.’s service
territory in Colorado west of the
Continental Divide; the portion of
Kansas located in the Missouri River
Basin; the portion of Kansas west of the
eastern borders of the counties
intersected by the 100th Meridian; the
portion of Nebraska west of the 101st
Meridian; and Wyoming east of the
Continental Divide.

4. Mt. Elbert Pumped-Storage: The
full 200 MW of Mt. Elbert capacity is
included in the LAP capacity
allocations. Only flow-through
generation is included in LAP energy
allocations, and customers may
schedule capacity without energy. Off-
peak energy must be returned to
Western commensurate with any on-
peak energy taken.

2025 PMI Procedures Requirements

Environmental Compliance

In compliance with the National
Environmental Policy Act (NEPA) of
1969 (42 U.S.C. 4321–4347 (2007)); the
Council on Environmental Quality
Regulations for Implementing NEPA (40
CFR parts 1500–1508); and DOE NEPA
Implementing Procedures and
Guidelines (10 CFR part 1021), Western
determined this action is
categorically excluded from further
NEPA review.
