Dear Sandee,

Re: 2025 Power Marketing Plan

Thank you for the opportunity to comment on Western Area Power Administration's SNR 2025 Power Marketing Plan. In no particular order, and outlined below, here are Tuolumne Public Power Agency's (TPPA) comments:

- Entitlement for New Melones
TPPA is inclined to keep the current standards in place: that the New Melones entitlement to be shared on an equal one-half basis between Calaveras and Tuolumne Counties; with the provision that one county may use the unused portion of the other county's entitlement on an interim basis, with a six month withdrawal stipulation.
- Full Requirements vs Percentage Option
TPPA would like to keep things the way they are, in continuing to receive full requirements, as the percentage option is not worth pursuing for our agency.
- Maximum Entitlement of FP Customers
TPPA would like the current standard left in place: A 20 year rolling average of historical generation data, recalculated every five years, with adjustments if a 10% threshold is met.

Please contact me if any of these comments need clarification.

Best regards,
