Subject: TPUD Comments on Western's Marketing Plan

Sandee,

Trinity Public Utility District would like to submit the following comments on Western's proposed marketing plan.

Maximum Entitlement of First Preference Customers

TPUD supports Western's calculation of the entitlements upon a 20-year rolling average of historical generation, recalculation of this amount every 5 years, and adjustments if a 10 percent threshold is met.

Full Requirements vs. Percentage Option

TPUD does not think the percentage option is necessary to be included in the 2025 PMP.

Term of Contract

TPUD strongly supports the longer (30 year) term that you have proposed. TPUD would encourage you to consider a 40 year term. Our business is extremely capital-intensive and certainly of power supply is desirable for our customers.

Thank you for the opportunity to submit comments.
