

SNR's 2nd Informal Stakeholder Meeting on the 2025 Power Marketing Program

SNR is seeking comments on two new issues:

Transmission

Generally, Western will market surplus available transmission capacity on the CVP and California-Oregon Transmission Project under Western's Open Access Transmission Tariffs. The legislation authorizing the Pacific Alternating Current Intertie (PACI) provides for the Secretary to market surplus available transmission capacity on the PACI at an equitable rate. Such surplus sales shall aid and benefit the CVP.

Comments:

Changes in the Electric Utility Industry

Western recognizes that there have been, and continue to be, significant changes in the electric utility industry. In order to address this concern, Western is proposing to include in the 2025 Power Marketing Plan, the ability for Western, in collaboration with its customers, to make changes in how the Federal resource is marketed if there is deemed a benefit to Western and its customers. Any changes implemented would be done through negotiation and revision to individual customer contracts.
