Why the CoSu Line?

The CoSu Line would help meet Northern California's energy needs and enhance the reliability of the electrical grid in the region. It would link the existing California-Oregon Transmission Project electric line in Colusa County to a new substation near the existing O'Banion Substation in Sutter County, with potential modifications to SMUD's existing Elverta Substation in Sacramento County. For more information visit www.cosuline.com or email info@cosuline.com.
