Subject: Dec 15th Informational Meeting Presentation and Q&A Posted to WAPA's Website

Dear Sierra Nevada Central Valley Project Customers:

Western Area Power Administration (WAPA) Sierra Nevada (SN) Region held an Informational Rates Meeting with customers on December 15, 2020, to provide additional information related to products that will become available in the near future under the new proposed rate schedule for the Sale of Surplus Products. This new proposed schedule was shared during WAPA's formal Rate Process for Rate Order WAPA-194. At the meeting, customers were notified that a short-term rate for the Sale of Surplus Products is being implemented to allow WAPA to provide Frequency Response Reserve (FRR) service beginning on January 7, 2021. However, after the December 15, 2020 meeting, WAPA was notified that the implementation date for FRR will be on January 14, 2021, due to concerns about implementing FRR during the week when many people are returning from holiday leave. The short-term rate is required to bridge the gap in time between the new implementation date for FRR, which is now on January 14, 2021, and the effective date of the new proposed Sale of Surplus Products Rate schedule of March 25, 2021. Additionally, information regarding the pricing for Resource Sufficiency products was also shared at the December 15th meeting. The PowerPoint presentation can be found on WAPA's Rate Case website at <https://www.wapa.gov/regions/SN/rates/Documents/informational-rates-meeting-20201215-slides.pdf>, along with the Q&A from the meeting which is also posted to our website at <https://www.wapa.gov/regions/SN/rates/Documents/informational-rates-meeting-20201215-questions-and-answers.pdf>.

If you have any questions, please feel free to contact the WAPA-SN Rates team at SNR-RateCase@wapa.gov.

Thank you,

Autumn Wolfe | Rates Manager
