**Subject:** Response to NCPA's 3/24/2011 Question

Nannette:

Yes, the total SVS plant value is estimated to increase to \$87.4 million. Assuming that estimate, as well as other plant estimates, the transmission plant ratio will increase by approximately 2 percentage points.

Thank you for participating in our public process.

Now that Western and SMUD were unable to negotiate a \$30M contributed funds agreement for the SVS, will the total SVS plant value increase to \$87.4 million? And if so, how does that the new plant value change the ratio of generation to transmission plant ratios in the future? Thank you.
