

The following question submitted in response to the Request for Proposals Regarding the Purchase of Renewable Energy Certificates, dated June 1, 2011, was received on June 1, 2011. Submitter names have been excluded for confidentiality.

1. My company owns the rights to RECS from a self generating facility in California. The solar energy is used to offset energy purchased from Southern California Edison. Would these RECS have value for this RFP?

Response:

Sub-sections 2.7 and 2.8 of the June 1, 2011 RFP provide guidance to the acceptability of RECs sought in this solicitation. Sub-section 2.7 also provides reference to additional guidance that may be used by vendors to determine the acceptability of their product.
