

**The following question submitted in response to the Request for Proposals Regarding the Purchase of Renewable Energy Certificates (REC), dated June 1, 2011, was received on June 13, 2011. Submitter names have been excluded for confidentiality.**

1. I want to confirm that a supplier can provide either; a Green-e Wholesale Attestation and Generator Attestation or a Green-e Wholesale Attestation and proof of retirement on a tracking system in lieu of the original Attachments 2 and 3 provided in the RFP?

**Response:**

Western may accept other forms of REC attestation/verification documentation in lieu of Attachments 2 and 3 provided with the June 1, 2011 RFP. Successful Vendors should request permission to substitute Attachments 2 and 3 with other forms prior to contract award. Generally, Western would accept Green-e documentation provided the product delivered is in fact Green-e certified.
