Beale Air Force Base Proposed Interconnection Line Project

REVISED DRAFT ENVIRONMENTAL ASSESSMENT - PUBLIC COMMENT PERIOD

Western Area Power Administration (WAPA), a power marketing administration within the U.S. Department of Energy, is seeking public input on a Revised Draft Environmental Assessment (EA) for a new 5-mile 230/60-kilovolt interconnection line with Beale Air Force Base (AFB). The project included two previous rounds of public scoping, initially in December 2017 and January 2018 and again in July 2018 when a third alternative alignment was identified. The Draft EA was jointly prepared by WAPA and Beale AFB to comply with the National Environmental Policy Act. The Draft EA was available for public review from January 2, 2020 to February 3, 2020 and from March 18, 2020 to April 17, 2020.

WAPA and Beale AFB have revised the Draft EA in response to comments received during the public review period. The Revised Draft EA is ready for public review and comments. Along with comment forms and other project information, the Revised Draft EA is available online at:

<https://go.usa.gov/xU9zz>

Instructions for submitting comments are on the back side of this postcard. Comments must be post-marked by **September 21, 2020**.
