

## Informal Customer Meeting Questions

### Informal Customer Meeting, Questions - from November 30, 2022

	<b>Question(s)</b>	<b>Response(s)</b>
1.	Is WAPA considering selling surplus transmission at market rates?	WAPA sets rates based on cost unless there is specific language in the legislation that would provide otherwise.
2.	If BANC changes its processes for how charges are passed to WAPA, will it impact the rate schedules?	Currently we have a component 2 in all our rate schedules that allows us to pass through Balancing Authority charges to relevant customers, or to the PRR. Component 2 is worded generally enough to still be relevant even if BANC makes changes to how they pass their costs to WAPA.
3.	Do you have an idea why the frequency response and regulatory rates are increasing?	Yes, we added station service projects to plant in service, and that shifted some costs toward the generation revenue requirement, which results in increased rates.
4.	Is FRR covered in the ancillary services rate schedules?	FRR is included in the Sale of Surplus Products rate schedule.
