

Having trouble reading this email? [View it in your browser.](#)

Good morning,

You are invited to a webinar about WAPA's [proposed Open Access Transmission Tariff revisions](#) to incorporate the Federal Energy Regulatory Commission's Order No. 845 *pro forma* changes into WAPA's Large Generator Interconnection Procedures and Agreement.

Join us for a [two-hour webinar](#) May 24 at 10 a.m.-noon MDT to review these revisions. There is no need to register, but we recommend copying and pasting the [webinar information](#) into your calendar.

In addition to sharing the proposed OATT revisions, we will outline the expected timeline to obtain stakeholder feedback, complete the revisions and file the revised OATT with FERC.

Before the webinar, we will post the meeting materials and a redline of the proposed revisions on WAPA's [Open Access Same-Time Information System website](#). The postings will also initiate a 30-day feedback period on the proposed OATT revisions.

To learn more about FERC Order No. 845 *pro forma* changes to both LGIP and LGIA as well as answers to other frequently asked questions, visit our [OASIS site](#).

We look forward to your participation at the webinar.

If you have any questions or comments, contact your WAPA OATT regional contact:
