

Historic Interest Rates

Western Area Power Administration
Updated October 16, 2023

The table below contains interest rates certified by the U.S. Department of the Treasury, under Table 9 - Power Marketing Administration - within the www.treasurydirect.gov site.

Interest rates are listed from the project's inception through the present, for all projects with repayment supervised by WAPA. The latest available interest rate is used for all future interest rate calculations.

^{1/} The minimum, or floor, rate is 3% for all WAPA & Bureau investments; therefore, when any year's interest rate falls below 3.0%, the floor rate will apply. The Corp of Engineers are not bound by the 3% cap so their investments can be calculated at a lower rate (see Rate Managers "Yield Rate - Floor rate issue paper July 2013").

Yield Rate (Yield Rate Applies to all projects except CRSP, CRSP Participating Projects, and Fry-Ark)

The average daily 'Yield Rate' calculated by the U.S. Treasury, on an annual basis, for Treasury bonds having terms of fifteen years or more remaining to maturity. The calculated Yield Rate is rounded to the nearest one-eighth of one percent.

The interest rate determined for fiscal year 2024 in accordance with the above-quoted formula is 4.0332% which adjusted to the nearest 1/8 of 1% is **4.000%**.

Coupon Rate (Applies to CRSP, CRSP's Participating Projects [Dolores, Seedskaadee, Olmsted], and Fry-Ark)

The "Coupon Rate" shall be determined by the Secretary of the Treasury, as of the beginning of the fiscal year in which construction is initiated, on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations, which are neither due nor callable for redemption for fifteen years from the date of issue.

The interest rate determined in accordance with the above-quoted formula is **3.051%**.

The Department of Energy Order No. RA6120.2 paragraph 11 (b) reads as follows:

"For purposes of this paragraph, the yield rate is the average yield during the preceding fiscal year on interest-bearing Treasury marketable securities of the United States which, at the time the computation is made, have terms of 15 years or more remaining to maturity. The average yield shall be computed as the average during the fiscal year of the daily bid prices. Where the average, so computed, is not a multiple of one-eighth of one percent, the yield rate shall be the multiple of one-eighth of one percent nearest to such average yield."

The interest rate determined for fiscal year 2024 in accordance with the above-quoted formula is 4.0332% which adjusted to the nearest 1/8 of 1% is **4.000%**.

Section 9 of Public Law 86-529 specifies that:

the interest rate for the Colorado River Storage Project and its participating projects "shall be determined by the Secretary of the Treasury, as of the beginning of the fiscal year in which construction is initiated, on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations, which are neither due nor callable for redemption for fifteen years from the date of issue.

The interest rate determined in accordance with the above-quoted formula is **3.051%**.
