

# Western Area Power Administration

## Sierra Nevada Region

---

### Information Only

---

To Central Valley Project Preference Customers and Interested Parties:

This email is to provide notification that the Western Area Power Administration (WAPA) Administrator has approved new formula rates for Pacific Alternating Current Intertie (PACI) Short-term Sales, Rate Schedules PACI-T4 and PACI-T5. The new rates, which are attached and can be found on our website by next week, are effective October 1, 2024, through September 30, 2025, or until superseded by another rate schedule, whichever occurs first.

Rates for Short-Term Sales, not to exceed one year, are required starting October 1, 2024, to charge cost-based and equitable rates for PACI transmission while the Sierra Nevada Region conducts a formal rate process beginning in the Fall of 2024.

For more information, please visit the [PACI Rate for Short-term Sales](#) webpage or the [SN Rates](#) webpage.

Thank you for your continued partnership.
