Subject: Sierra Nevada Advance Customer Notification: Intent to File 5-year Formula Rates for the Pacific Alternating Current Intertie Point-to-Point Transmission Service
Date: Thursday, September 12, 2024 11:33:36 AM

Western Area Power Administration Sierra Nevada Region

Information Only

To Central Valley Project Preference Customers and Interested Parties:

Western Area Power Administration (WAPA) Sierra Nevada (SN) Region plans to file 5-year formula rates under Rate Order No. WAPA-211 for the Pacific Alternating Current Intertie (PACI) Point-to-Point (PTP) transmission service.

WAPA-SN is proposing to conduct a major rate process from September 2024 through August 2025, to set rates into effect October 1, 2025, through September 30, 2030.

WAPA-SN will start the process with an informal customer meeting October 9, 2024, from 2:00pm – 5:00pm PDT. During the informal process, customers will have the opportunity to ask questions, provide comments, and feedback that will be taken into consideration before the rates are finalized. After completing the informal process, by December 2024, WAPA-SN will start the formal process by publishing a notice of Proposed Rate Adjustment in the *Federal Register* and allow for a 90-day comment period.

“Save the Date” email appointment invitations will be sent out for WAPA-SN’s informal and formal rate process meetings. WAPA-SN will continue to provide annual rate updates and other information customers seek, in writing, at customer meetings, and on WAPA-SN’s website. Please visit [2025 Rate Case WAPA-211 - Western Area Power Administration](#) for the latest information on this process.

Feel free to reach out with questions at SNR-RateCase@wapa.gov.

Thank you for your continued partnership.
